

AI Overlord (WIZARD): A Community-Driven Memecoin Built on Ethereum Blockchain

The founders
www.aioverlord.io

Abstract. AI Overlord (WIZARD) is a memecoin that embraces the memetic irreverence of AI Overlord with the mystique and power of The Undeterred Wizard. It was stealth launched in September 2023 as an ERC-20 token on Uniswap without any pre-sale. There are no transaction taxes. The smart contract was developed without an owner. It has a maximum and total supply of 100,000,000,000,000 tokens, all of which are in circulation. Out of the maximum supply, 93.1% was sent to the liquidity pool and 100% of LP tokens were burned. No new tokens can be minted.

1. Introduction

Storyline

Behold the wizard. Beware his powers. I for one welcome our new AI Overlord!

Imagine this: A few years have passed and the world is different from what we know. Artificial intelligence dominates every aspect of daily life. Society is divided between humans, humanoid robots, mystical beings and intelligent animals whose intellectual capacity has been exponentially enhanced through the installation of AI chips in their brains. Tension grows among these groups, and everyone spends more time in the metaverse than in the real world.

In this context, Shiba Inus and frogs have attained positions of power in politics, but none compare to the undeterred Wizard, who with their unspeakable powers recently assumed the position of the supreme leader of a world now organized under a single central government. Rumors run the streets that the entire advanced AI system in existence was developed through a single public demonstration of power by the Wizard. However, some people dare to discredit Wizard's leadership without realizing the vulnerable position they put themselves in. But the WIZARD is UNDETERRED!

Background and Inspiration

AI Overlord (WIZARD) is a community-driven unique memecoin that embraces the memetic irreverence of AI Overlord along with the mystique and unspeakable powers of the undeterred Wizard. Launched on the Ethereum network (ERC-20), it pays tribute to the famous meme and iconic cartoon character.

WIZARD is designed to entertain the crypto community and provide a unique experience for enthusiasts, aiming to establish WIZARD as one of the leading meme-based cryptocurrencies, just as the character is destined to be.

Stealth launched on Uniswap in September 2023 without any pre-sale, in order to honor the community and provide equal opportunities to all members, it combines the dominance of artificial intelligence with the power of the mystical duck in an environment previously dominated by dogs in the memecoin universe.

It was developed using AI tools such as GPT-4 and DALL·E 2, among others.

2. About AI Overlord (WIZARD)

Token Overview

AI Overlord (WIZARD) stands out as a memecoin that embraces the memetic irreverence of AI Overlord along with the mystique and power of The Undeterred Wizard, aiming to entertain the community.

There are no transaction taxes. By not imposing taxes, the project can attract a broader audience and expand its user base while still rewarding liquidity providers through a redistributive system. It also aims to implement alternative burning mechanisms to maintain token scarcity and deflationary characteristics.

In order to promote transparency and security within the community, a decentralized smart contract without an owner was developed, where the developers renounced the possibility of ownership, 100% of the liquidity provided by the founders has been permanently locked on Uniswap, and LP tokens have been burned.

Therefore, the community can invest in AI Overlord (WIZARD) with greater confidence, as there is no risk of rug pull, and no trading taxes can ever be implemented or new tokens minted, given that the smart contract become immutable.

AI Overlord (WIZARD) is available for trading on the decentralized exchange Uniswap, paired with ETH.

Tokenomics

AI Overlord (WIZARD) has a maximum and total supply of 100,000,000,000,000 tokens, and 100% of the tokens are in circulation. Of the maximum supply, 93.1% was sent to the liquidity pool on Uniswap, where

100% of the LP tokens were burned. The remaining 6.9% is held in the founders' wallet and may be used for future listings on CEX, bridges, liquidity pools and partnerships. The smart contract was developed without an owner. There are no transaction taxes. Trading taxes cannot be implemented, and no new tokens can be minted.

WIZARD is a deflationary token as every dex swap puts 0.3% back into the contract and it's locked forever. In other words, there is a 0.3% fee for swapping tokens on Uniswap. This fee is split by liquidity providers proportional to their contribution to liquidity reserves. Considering that 93.1% of the max supply was sent to the liquidity pool and all LP tokens were burned, WIZARD maintains a deflationary token model as the fees corresponding to these LP tokens are inaccessible. Additionally, other burning mechanisms may eventually be implemented in the future.

Security and Technology

AI Overlord (WIZARD) is an ERC-20 token built on the Ethereum blockchain, secured by the Proof-of-Stake (PoS) consensus mechanism. Decentralized validators stake 32 ETH to process transactions and secure the network.

3. Roadmap

Phase 1: Research and Development

Extensive research and development are conducted to ensure the creation of a robust and secure infrastructure. The smart contract is developed, and the token is created. The token is launched for trading on the decentralized exchange Uniswap, liquidity is provided and locked, and LP tokens are burned.

Phase 2: Website Launch and Market Exposure

The official AI Overlord (WIZARD) website is launched, providing a platform for community engagement. Official social media accounts are created to interact with the community. The token is listed on major market tracking platforms such as CoinMarketCap and CoinGecko, and the first version of the whitepaper is released to the public.

Phase 3: Community Engagement and Marketing

Social media channels are used to promote the project and engage with the community. The token is featured on specialized websites to increase visibility. Efforts are made to grow the number of holders, fostering a strong and active community. Discussions and negotiations are conducted to list AI Overlord (WIZARD) on centralized exchanges, providing greater accessibility to a wider audience.

Phase 4: Community Expansion

Community engagement initiatives are implemented to encourage participation. Strategic marketing efforts are made to raise awareness about AI Overlord (WIZARD) and attract new members to the community. Strategic partnerships are formed to leverage synergies and explore mutually beneficial opportunities. Negotiations are conducted and measures are taken with the goal of securing Tier 1 listings.

4. Legal Disclaimer

AI Overlord (WIZARD) is a meme-based cryptocurrency with no intrinsic value or utility beyond its role as entertainment within the community. The project has no development team, and its founders have not been disclosed.

AI Overlord (WIZARD) is not associated or endorsed by the creators of the character Daffy Duck or any related company or individual.

Investing in cryptocurrencies, including AI Overlord (WIZARD), carries risks due to the high volatility and speculative nature of these assets. Potential investors should conduct their own research before engaging in any transactions.

The information provided in this whitepaper is for informational purposes only and is not definitive, as it may be subject to change in the future. Furthermore, it does not constitute financial or investment advice.

5. Conclusion

AI Overlord (WIZARD) is a unique memecoin that aims to capture the captivating essence and memetic irreverence of the iconic character within the cryptocurrency space. With a commitment to community-driven development and a deflationary token model, WIZARD strives to establish itself as one of the leading meme-based cryptocurrencies. For more information and updates, please visit the official website and follow the social media channels.

Born too late to explore Earth. Born too early to explore the galaxy. Born just in time to witness the rise of WIZARD.
